

Designing your playground:

- What material will I use?
- How will I attach the different parts?
- What will I decorate it with?

What do we need to think of when making a playground?

- Can children fall from it?
- Will it fall over?
- Is it easy to climb up?
- Will children want to play on it? Is it colourful enough?
- Can children slide down it?
- What is the best material to use?

Evaluating your playground:

What do you like the most about your playground and why?

What was your favourite part of making the playground?

What would you do differently if you did it again?

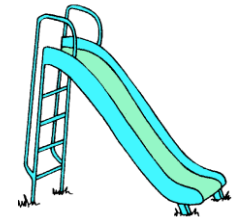

Making a playground

Playground equipment and what they are made from:

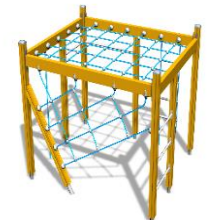

Swings can be made from metal, rubber and wood.

Slides can be made from metal, plastic and wood.

Climbing frames can be made from rope, wood and metal.

What other equipment can you think of?
