

The Internet

Key Learning

- How the internet, World Wide Web and browsers work together
- Hardware used to access the internet
- Websites and webpages
- Browsers and search engines

Browser	A program used for displaying and navigating between web pages.
Home Page	Often the first page of a website.
Internet	Away to send information from one device to another anywhere in the world.
Search Engine	A website that helps us find information e.g. Google.
Smart Device	A device (like a TV, phone or watch) that can connect to the internet.
Webpage	A single page of information on a website.
Wi-Fi	A way to connect to the internet without wires.
World Wide Web	The webpages and documents you see when you are browsing online.

Key Questions

- What is the difference between a website and a webpage?
- What makes a device a smart device?
- Can you explain what a browser does?
